Dated Bangalore, 22 5 1909.

24th

Sir,

i 78-08 Sg 16-1

With reference to the correspondence ending with Mr. Chandrasekhara Iyer's letter No. 602 dated the 27th January 1909, I am directed to forward herewith, for the information of the Mysore Durbar, a copy of Circular letter from the Government of India in the Department of Revenue and Agriculture No. 7-156-1, dated the 6th May 1909, with its enclosure regarding tabulation of the statistics of Coffee production and to request that future returns, prepared in the revised -- form prescribed by the Government of India may be furnished so as to reach this Residency by the 1st November.

I have the honour to be,

Sir,

Your most obedient servant,

for First Assistant Resident.

Circular No. 7—156-1.

Simla, the 6th May 1909.

SUBJECT.

Preparation of the Annual Returns of the production of coffee for the Revenue year in place of the Calendar year.

G. C. B. P., Simla.—No. 52 R. & A. D.—7-5-09—86.—C. P.

5

Circular No. 7—156-1.

FROM

C. A. INNES, ESQ., I.C.S.,
Under Secretary to the Government of India,

TO

The Hon'ble the Director-General
of Agriculture.

Dept. of Rev. & Agri.
Agriculture.

Simla, the 6th May 1909.

SIR,

I AM directed to say that the annual returns of the production of coffee are at present prepared for the calendar year in accordance with the instructions given in paragraph 7 of the Resolution of the Government of India (Department of Revenue, Agriculture and Commerce) No. 11, dated the 29th October 1878. This arrangement is open to the objection that the calendar year does not coincide with the coffee picking season in Southern India (where 99·9 per cent. of the whole crop in India is grown), with the result that the returns have hitherto shown part figures for two different seasons, and not complete figures for one whole season as is desirable. It has therefore been decided by the Government of India that, in supersession of previous orders, the returns should be prepared for the revenue year ending on the 30th June (to which period most of the agricultural returns of the Madras Presidency relate) so as to show so far as possible figures for a complete coffee season.

2. The form for the tabulation of the statistics of coffee production, prescribed in the Director-General of Statistics' letter No. 1934-42, dated the 10th September 1903, has also been revised and simplified by the Director-General of Commercial Intelligence, and a copy of the revised form is enclosed. It will be noticed that column 11 of the new form specifies the quantity in bushels, and not in pounds as in the old form, and provides for both cherry-dried and parchment coffee. It has been explained in a footnote to the form that this column is not intended to represent the same coffee in two commercial stages, but to show the actual quantity produced in either the one or the other denomination, or both. For the purposes of the Imperial return, the conversion of cherry-dried and parchment coffee according to measure, into cured coffee according to weight, will be made in the office of the Director-General of Commercial Intelligence according to a fixed formula.

3. The revised form will, it is believed, serve for all statistical purposes and give all the information required by persons interested in the coffee crop, and I am to request that with [illegible]
it may be adopted in the preparation of the future returns of coffee production.

4. November 15th has been fixed provisionally as the date on which the return should reach the office of the Director-General of Commercial Intelligence. I am to add that if there is no objection, the first return in the new form may be

prepared for the year ending on June 30th 1909 and transmitted to the Director-General of Commercial Intelligence by November 15th next.

I have the honour to be,

SIR,

Your most obedient Servant,

C. A. INNES,

er-Secretary to the Government of India.

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

(1) Government Proceedings No. R. 5498-506—Agri. 78-08-5, dated the 29th January 1909, directing the submission of the return of coffee cultivation in a revised form for the year ending 30th June so as to comprise information for a complete coffee season.

(2) Letter No. 3108, dated the 22nd May 1909, from the First Assistant to the Hon'ble the Resident in Mysore, forwarding the following copy of Circular No. 7.—156-1 of the 5th May 1909, issued by the Government of India in the Department of Revenue and Agriculture, regarding the tabulation of the statistics of coffee production in future:—

"I am directed to say the annual returns of the production of coffee are at present prepared for the calendar year in accordance with the instructions given in paragraph 7 of the Resolution of the Government of India (Department of Revenue and Agriculture and Commerce), No. 11, dated the 29th October 1878. This arrangement is open to the objection that the calendar year does not coincide with the coffee picking season in Southern India (where 99·9 per cent of the whole crop in India is grown), with the result that the returns have hitherto shown part figures for two different seasons, and not complete figures for one whole season as is desirable. It has therefore been decided by the Government of India that, in supersession of previous orders, the returns should be prepared for the revenue year ending on the 30th June (to which period most of the agricultural returns of the Madras Presidency relate), so as to show, so far as possible, figures for a complete coffee season.

"2. The form for the tabulation of the statistics of coffee production, prescribed in the Director-General of Statistics' letter No. 1934-12, dated the 10th September 1903, has also been revised and simplified by the Director-General of Commercial Intelligence and a copy of the revised form is enclosed. It will be noticed that column of the new form specifies the quantity in bushels, and not in pounds as in the old form, and provides for both cherry-dried and parchment coffee. It has been explained in a footnote to the form that this column is not intended to represent the same coffee in two commercial stages, but to show the actual quantity produced in either the one or the other denomination or both. For the purposes of the Imperial return, the conversion of cherry-dried and parchment coffee according to measure, into cured coffee according to weight, will be made in the office of the Director-General of Commercial Intelligence according to a fixed formula.

"3. The revised form will, it is believed, serve for all statistical purposes and give all the information required by persons interested in the coffee crop, and I am to request that with your permission it may be adopted in the preparation of the future returns of coffee production.

"4. November 15th has been fixed provisionally as the date on which the return should reach the office of the Director-General of Commercial Intelligence. I am to add that if there is no objection, the first return in the new form may be prepared for the year ending on June 30th 1909 and transmitted to the Director-General of Commercial Intelligence by November 15th next."

No. R. 10165-73—Agri. 78-08-8, dated Bangalore, 1st June 1909.

Order thereon.—Communicated to the Deputy Commissioners of Districts with a request that future returns of coffee production may be prepared in the revised form prescribed by the Government of India, and furnished to this office through the Revenue Commissioner before the 20th October each year.

K. S. CHANDRASEKHARA AIYAR,
Secy. to Govt., Gen. & Rev. Depts.

To The Revenue Commissioner in Mysore.
The Deputy Commissioners of Districts.

Revenue (Agriculture), dated 1st June 1909.

Statement of the production of Coffee in ——— during the year ending 30th June ———

District	Number of plantations on 30th June	Planted area as in previous year's statement	New area placed under coffee (including replanting in areas abandoned in previous years)	Coffee cultivation abandoned during the year	Total area under coffee	Area that has been plucked during the year	Area that has not been plucked during the year	Persons employed (daily average)		Quantity (in bushels) of coffee	
								Permanent	Temporary	Cherry-dried	Parchment
1	2	3	4	5	6	7	8	9	10	11	
		Acres	Acres	Acres	Acres	Acres	Acres				

Columns 3—6.—The sum of columns 3 and *4 minus* column 5 should equal the *total* in column 6.
Columns 7 and 8.—The sum of these two columns should be equal to the total in column 6.
Column 10.—The number of persons employed for any period less than a year should be multiplied by the number of days in that period and the total divided by 365. The results should be entered in this column.
For example, if an estate employed 80 persons for 90 days, 40 for 60 days, and 100 for 45 days—

$80 \times 90 = 2,700$
$40 \times 60 = 2,400$
$100 \times 45 = 4,500$

The total 9,600 divided by 365 gives 26 in round numbers, which is the figure to be entered in this column
Column 11.—The figures in this column are not intended to represent the same coffee in two stages (on the analogy of rice and paddy), but the actual quantity produced, whether it be in the form of cherry-dried or parchment coffee at the time of report.

NOTE.—(*a*) Explanations of noticeable variations in the figures of the year compared with the previous year together with any information regarding the character of the season and crop, trade and other points of interest connected with the condition and prospects of the industry, should be furnished.

(*b*) If any rectifications or additional particulars are received after the return for the year has been submitted, a supplementary return for that year should be forwarded.
